“Atmospherically-produced beryllium-10 in
annually laminated late-glacial sediments of the
North American Varve Chronology” by Greg Balco
et al.

Received and published: 17 June 2020

This is to call readers' attention to a minor typographical error that may make it unnecessarily difficult to understand part of the methods.

On page 7, line 21, "¹⁰Be" incorrectly appears in place of "⁹Be".

This sentence should read:

"Our basic approach is to (i) use ⁹Be concentrations in sediment as a measure of

C1

both the delivery of background Be to the lake and any environmental factors affecting Be scavenging efficiency in the lake, and then (ii) identify additional variation in the ¹⁰Be flux that cannot be accounted for by these effects and must therefore represent variability in the atmospheric fallout flux."

We apologize for the error.
