

Interactive comment on “Confined fission track revelation in apatite: how it works and why it matters” by Richard A. Ketcham and Murat T. Tamer

Raymond Jonckheere (Referee)

raymond.jonckheere@geo.tu-freiberg.de

Received and published: 18 November 2020

Review supplied as attached pdf. A second pdf with an annotated manuscript cannot be uploaded. This portal is the most detestable yet conceived.

Please also note the supplement to this comment:
