Dear Dr. Seong,

We thank you for inviting us to resubmit our manuscript with minor revisions. In addition to all our edits made at the request of the reviewers (seen in our responses to their comments), we made a few minor edits to fix grammar, streamline sentences, and update ^{36}Cl data (everything can be seen on our tracked changes version we submitted). Our new data, however, do not affect our interpretations.

Thank you,

Caleb Walcott
University at Buffalo, Department of Geology
