**Dear Dr. Simpson,** (associate editor/Sandra Kamo)

Thank you for your revised manuscript in which you have addressed all comments raised by the two reviewers, and in particular the many detailed suggestions made by reviewer Roberts.

I am pleased to recommend this innovative methodology/application paper for publication after a number of minor technical items have been addressed:

-line 18—this sentence should be improved by splitting into two or by better punctuation

Changed line 18 to: 'Calcite ($CaCO_3$) is the main mineral phase of most carbonate sedimentary rocks and their metamorphic equivalents. Calcite is also a common diagenetic phase and is a major component of carbonatites.'

-line 135—reference to "Schetselaar et al., 2018" is noted as "2017' in reference list

Changed line 135 to Shetselaar et al., 2017

-line 145—reference to "Breeman and Corriveau, 2005" should be "van Breemen and Corriveau, 2005" and changed accordingly in reference list

Changed line 145 to 'van Breemen and Corriveau, 2005 and updated reference in list.
