

Please, if possible, change the orientation of tables 2 and 3 to portrait. Furthermore, Supplement figure should be renamed according to the standards to Figure S1

Table 2 was set up in portrait orientation. Table 3 is too wide to fit in A4 portrait orientation. Therefore, I used the "sidewaystable" function provided by the Latex template. The numbering of the supplementary figure was changed to Figure S1. This was also changed in the text of the manuscript.
